

# POST-PROCEDURE CARE AT A GLANCE

**01**

**Take your medications exactly as prescribed**

**02**

**Call your cardiologist if you have:**

- general questions
- shortness of breath
- a fever within 7 days of your procedure
- a hard lump or drainage from your wound

**03**

**Call 911 if you have:**

- new chest pain
- nausea or vomiting
- new dizziness or lightheadedness
- new bleeding from the wound that won't stop

**04**

**Schedule your first cardiac rehabilitation visit**
